

Punctuation stripping and rule based tokenization

1

Text normalization step

It's stable -- parser [beta] (V1) passed.

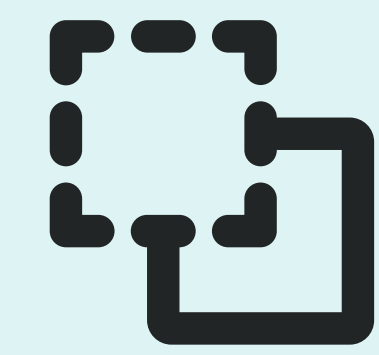

2

Wrap hyperlinks

<LINK_mple> https://test.com/example </LINK_mple>

3

Apply punctuation rules with excluding hyperlinks

4

Unwrap wrappers

Prompt

Instruct QA Text Document

Regex Based Tokenizer

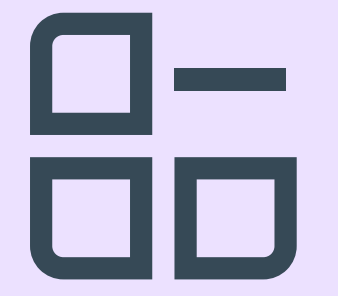

Lexical filtering

Interrogative inspection

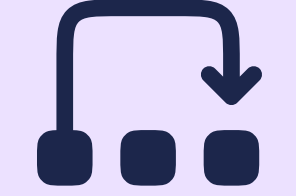

Detokenization

Compressed prompt

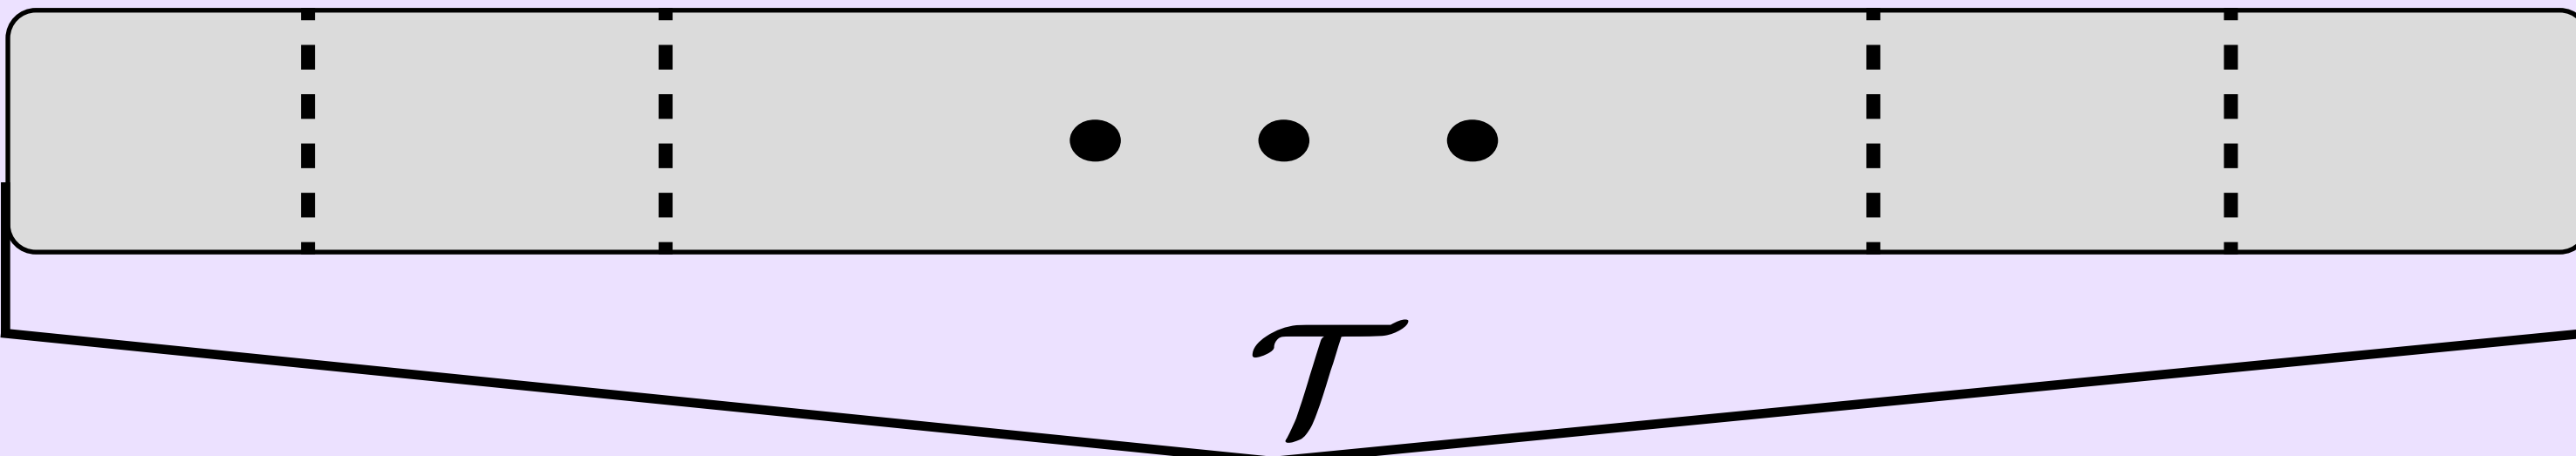

Stopwords exclusion

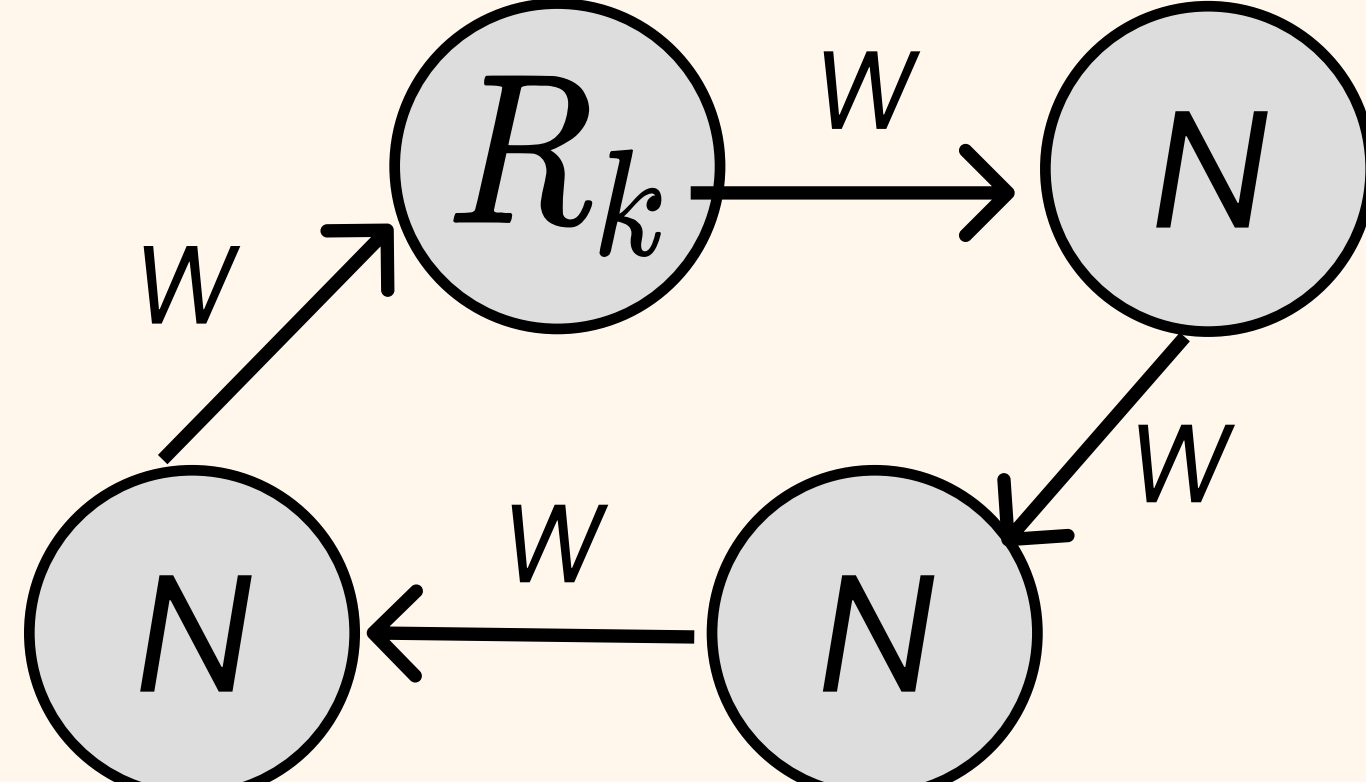

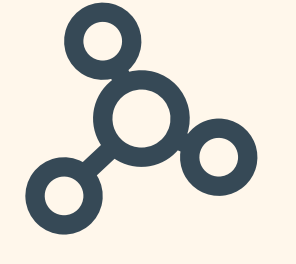

Token prior to punctuations saving

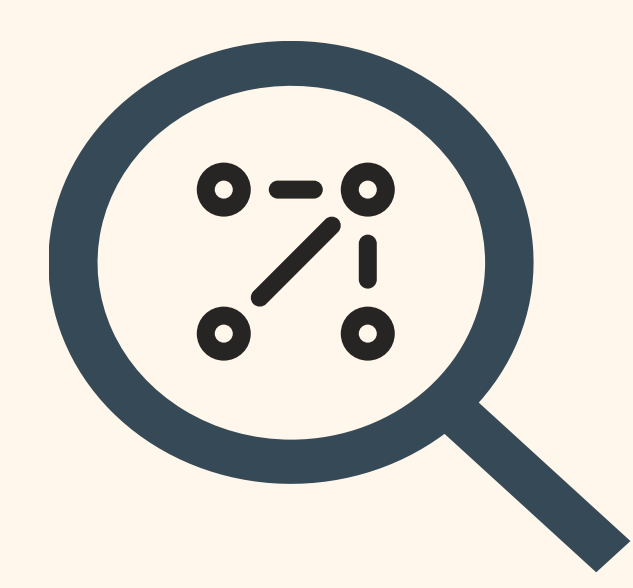

Buffer ℓ_p

Form directed weighted graph

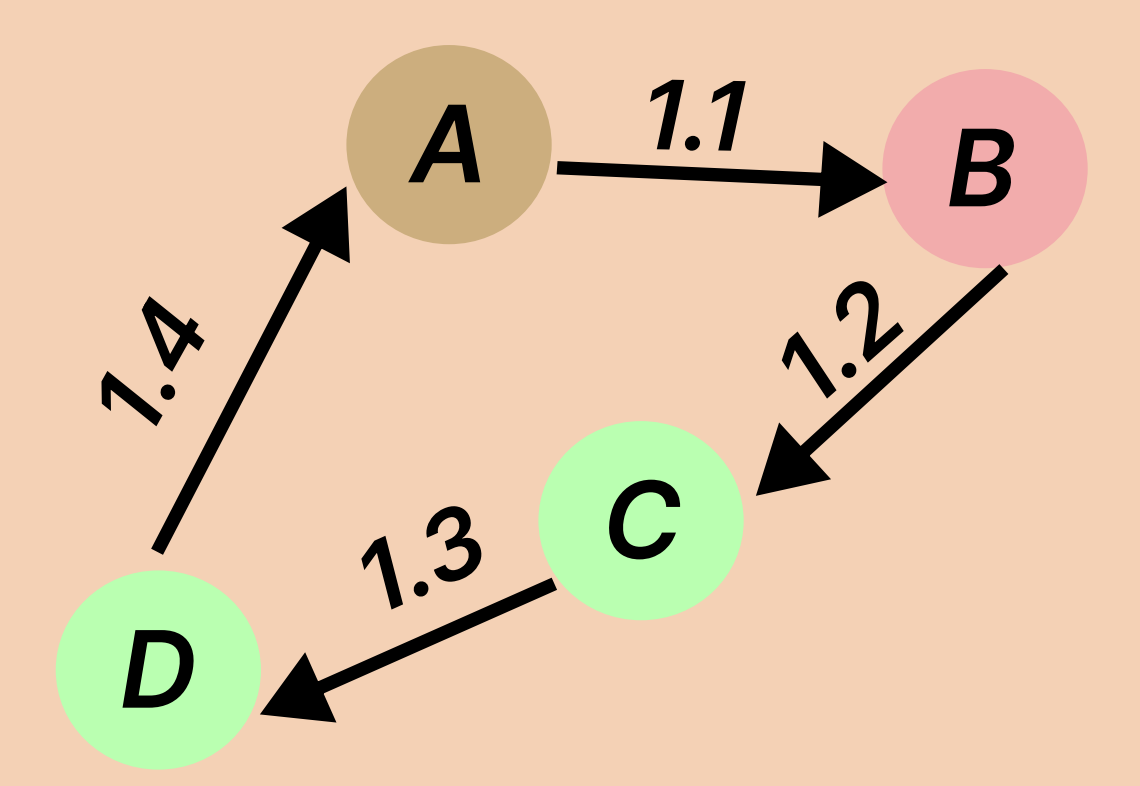

Begin Interrogative Inspection

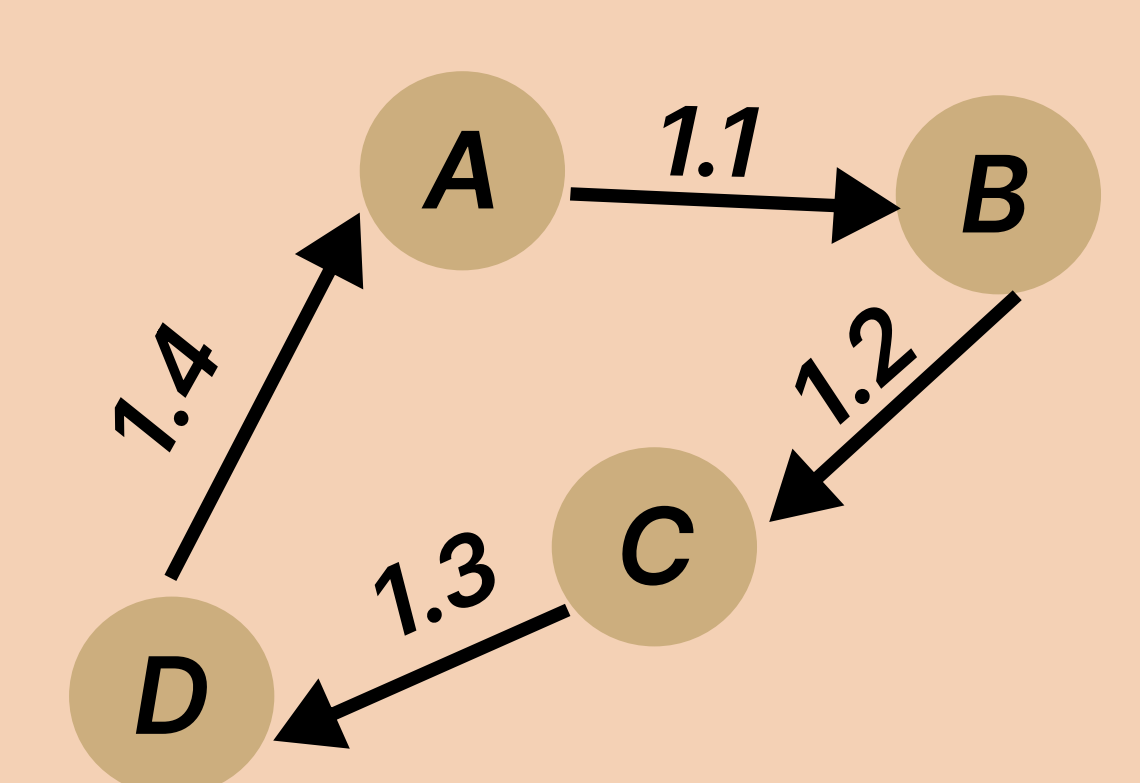

Inspection on each cycle of the graph

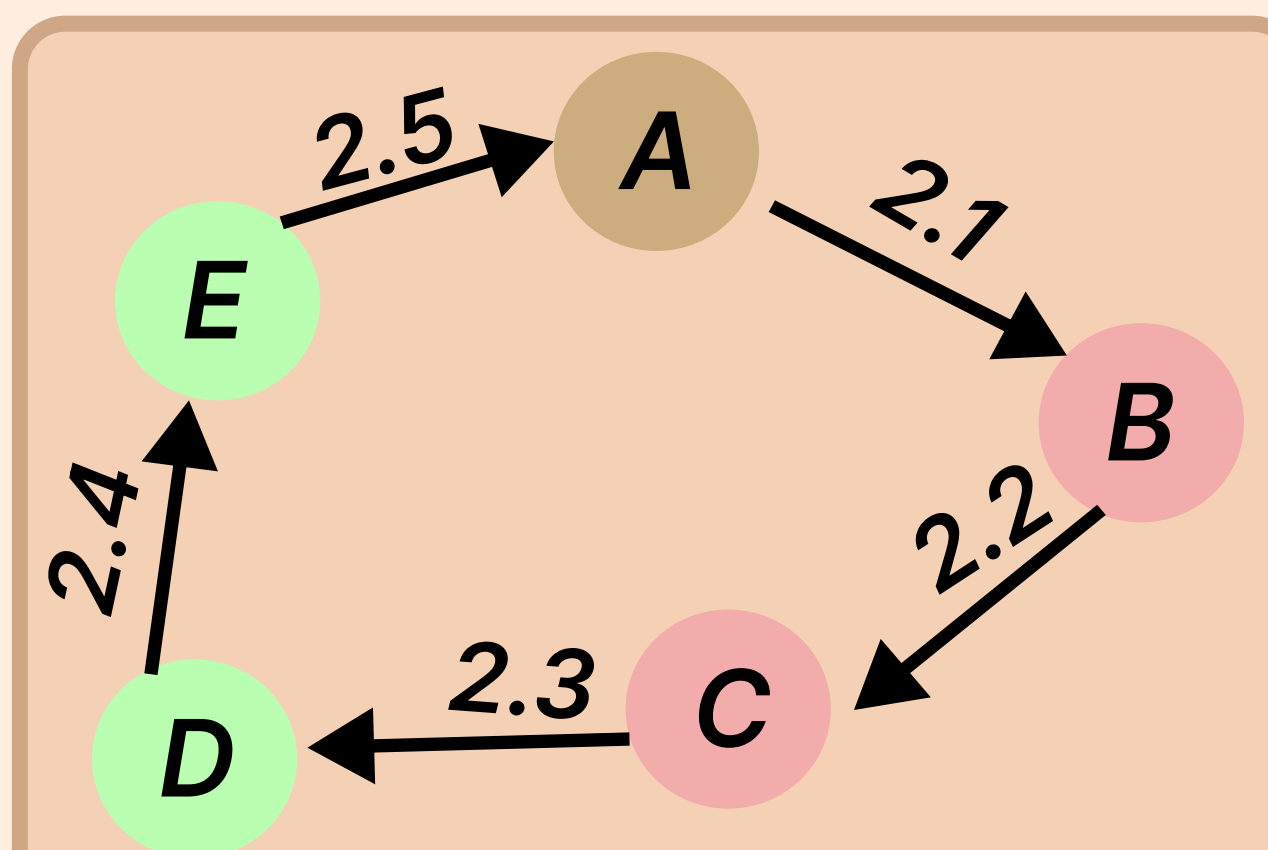

Progress

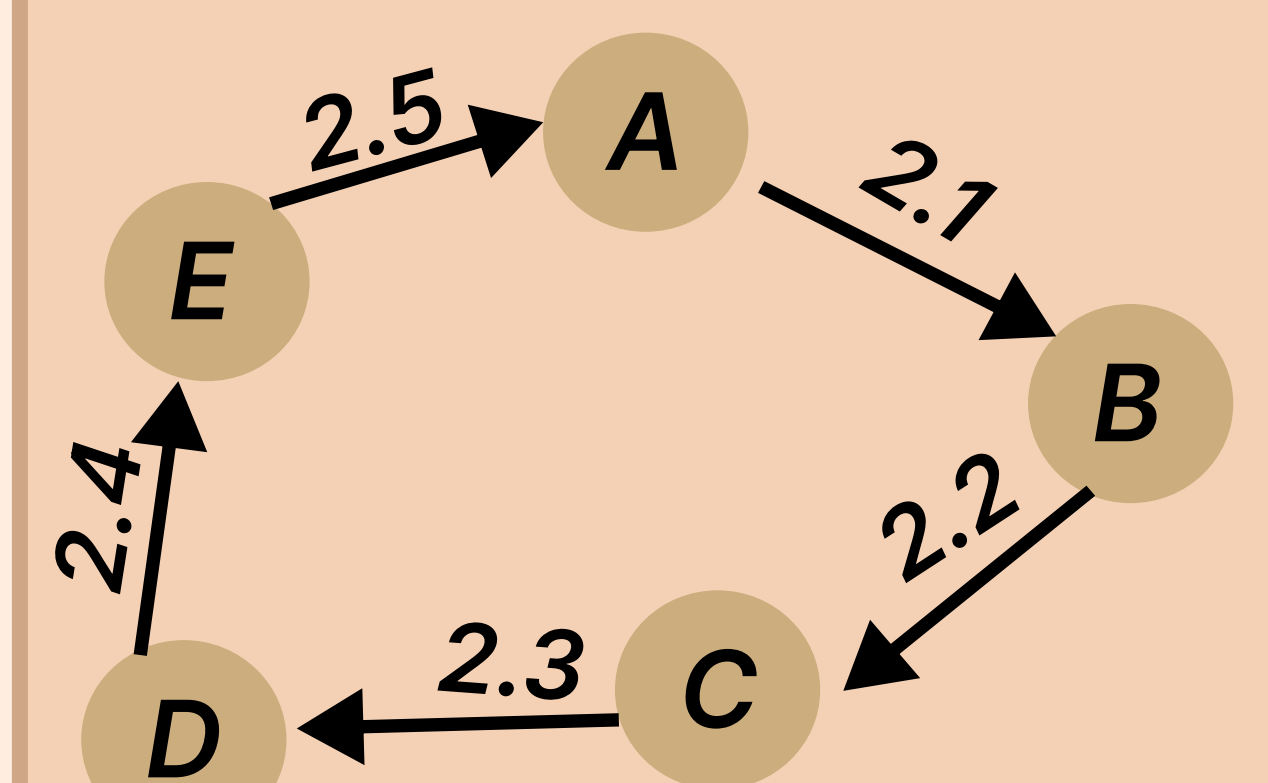

$((A, B) \mid 1.1) = \text{X}$
 $((B, C) \mid 1.2) = \text{checkmark}$
 $((C, D) \mid 1.3) = \text{checkmark}$

Cycle: 1

$((A, B) \mid 2.1) = \text{X}$
 $((B, C) \mid 2.2) = \text{X}$
 $((C, D) \mid 2.3) = \text{checkmark}$
 $((D, E) \mid 2.4) = \text{checkmark}$

Cycle: 2
